

# THE NEW UNIVERSAL APP

## EASY DIVE PICS

by Massimo Boyer

### ***In Summer 2023 Easydive releases a new App: EASYDIVE PICS***

Today we're talking about a tasty preview, it will be called Easydive Pics and it will be a single APP that will recognize both Easydive housings dedicated to IOS smartphones: Diveshot and Leo3 Smart.

The brand new application will be released at the end of July and will be downloadable for free from the App Store.

To use the new Easydive Pics App, simply download it onto your smartphone, turn on your housing and perform the bluetooth pairing. With the new App you can start taking unforgettable photographs with your smartphone using it as a real underwater camera.

In water, you can manually adjust the following parameters:

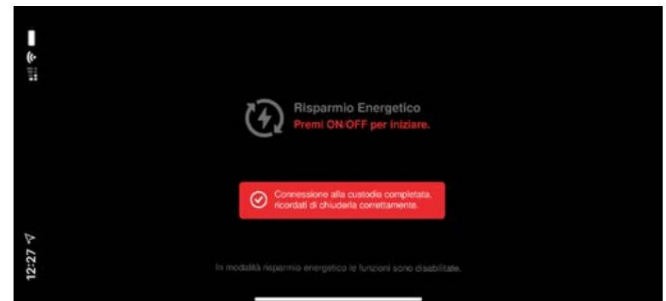

- times;
- ISOs;
- HDR** ;
- White balance;
- auto focus or manual.

If, on the other hand, you don't want to set all these parameters, not everyone feels like a photographer capable of having complete manual control, you can use the camera in automatic mode.

With Easydive housings:

- You can easily switch between photo and video modes with just the push of a button.
- You can use ultra-wide cameras and have zoom control up to 3X for each camera. You can have control over the extension of JPG, HEIFF or RAW photo and full HD or HD 4K video

Thanks to the custom white balance function, you can manually set the white during the dive.

You can set energy saving mode with the push of a button. it is in fact possible to put the smartphone in standby and save energy.

We remind you that the **Leo3 smart** housing is universal for all iOS smartphones and many Android models

and is guaranteed for life up to a depth of -150m.

Communication with the smartphone takes place via a bluetooth connection and through the integrated button it is possible to intervene on the mobile phone without using the touch screen, thus avoiding problems of excessive pressure. Furthermore, the case has a battery pack that recharges the mobile phone during the dive, so you will never leave the water with the mobile phone empty.

The **Diveshot housing**, price range cheaper than the previous one,

it always works via bluetooth and activates an optical sensor to transmit commands to the outside.

The Diveshot also accommodates all iOS smartphones and many Android models. If you have doubts about the possibility of disguising your mobile phone, contact the Easydive assistance service, very efficient and very quick response to your requests.

The new Easydive Pics app will be compatible with all Diveshot and Leo3 smart housings that have been sold or updated after 1 January 2022. for all others, it will be necessary to carry out maintenance and updating at the Easydive headquarters at cost of 90.00 euros including VAT plus shipping costs.
